**NARRATIVE.** FRAGORD provides guidance and commander's intent to subordinate commanders in order to (IOT) execute combined force operations in the USPACOM area of operations (AOR) in support of (ISO) Operation PACIFIC SHIELD, including decentralized control of operations through conditions- based delegation of authorities in response to enemy disruption of connectivity.

## 1. SITUATION.

### 1.A. General.

1.A.1. Despite intense diplomatic engagement over the previous 3 months, relations in the Taiwan Strait have continued to deteriorate. Leaders of the Chinese Communist Party (CCP) have grown increasingly frustrated with what they perceive as US interference in their internal affairs. Growing civil discontent over the People's Republic of China (PRC) and Taiwan relations threatens the CCP's legitimacy as the one true governing body of China.

1.A.2. In May 2030, the People's Liberation Army Army (PLAA) began deploying forces from the People's Liberation Army's (PLA) Western Theater Command to reinforce PLA Southern and Eastern Commands with a heavy concentration of forces near the Taiwan Strait. CJTF Agile Dragon/J2 has also reported increased airspace incursions in the Taiwan Strait and heightened

EXERCISE OTS USE ONLY

readiness activities occurring at People's Liberation Army Navy (PLAN) South Sea Fleet HQ and PLAN East Sea Fleet HQ.

1.A.3. In July 2030, PLAN announced a naval blockade around Taiwan, cutting off the island's trade routes and communication lines. The US condemned the action as a violation of international law and Taiwan's sovereignty. In a public statement contrary to the US longstanding policy of strategic ambiguity, the President of the United States (POTUS) affirmed that the US will defend Taiwan's sovereignty with military force. The US and coalition forces have responded to the blockade by increasing their force posture in the Indo-Pacific region.

1.A.4. In the past 24 hours, the People's Liberation Army Rocket Force (PLARF) conducted precision shaping fires followed by a PLAN amphibious assault on the Taiwan-controlled Kinmen Islands. Another close incursion occurred between USN and PLAN vessels in the South China Sea as the PLAN seeks to secure its position in the vicinity of (IVO) the Paracel and Spratly Islands. The incident resulted in verbal warnings from both sides but no kinetic engagements.

1.A.5. PLA A2AD capabilities in Eastern Theater Command remain largely intact and operational. PLA has retasked reinforcements from Northern Theater Command and Western Theater Command to mass forces IVO Taiwan Strait.

1.A.6. CJTF Agile Dragon has experienced disruptions in connectivity due to persistent jamming and cyber-attacks on C4I infrastructure. CJTF Agile Dragon/J2 assesses that the PRC will continue to conduct jamming and cyber-attacks in an attempt to disrupted coalition command and control networks.

1.A.7. Multiple APODs in the JOA operating as main operating bases and forward operating sites have sustained runway damage from PLA ballistic missile attacks. CJTF Agile Dragon/J2 assesses that PLARF will continue to prioritize coalition airfields for ballistic missile attacks.

1.A.8. CJTF Agile Dragon/J2 assesses that, within the next 96 hours, the PLA will execute a simultaneous airborne assault to secure Penghu Island and an amphibious assault to seize Taiwan. POTUS has authorized CJTF Agile Dragon to repel a PLA's invasion of mainland Taiwan through the use of lethal force IOT protect Taiwan's sovereignty. Kinetic strikes on mainland China are authorized, as required, to meet this objective.

**1.B. Political Assessment.**

1.B.1. **US Relations with Taiwan.**
1.B.1.A. POTUS affirmed that the US will defend Taiwan sovereignty and authorized the use of force against the PLA.

1.B.2. **Access, Basing, and Overflight Rights.**
1.B.2.A. Indonesia: Pending. US Department of State (DoS) will provide a daily update to Combined Joint Task Force Commander (CJTFC).
1.B.2.B. Brunei: Pending. DoS will provide a daily update to CJTFC.
1.B.2.C. India: Pending. DoS will provide a daily update to CJTFC.

EXERCISE - OPS USE ONLY

1.B.2.D. Malaysia: Pending. DoS will provide a daily update to CJTFC.
1.B.2.E. Philippines: Full access, basing, and overflight rights. DoS does not anticipate any changes to this status.
1.B.2.F. Singapore: Pending. DoS will provide a daily update to CJTFC.
1.B.2.G. Thailand: Full access, basing, and overflight rights. DoS does not anticipate any changes to this status.
1.B.2.H. Laos: Pending. DoS will provide a daily update to CJTFC.
1.B.2.I. Vietnam: Pending. DoS will provide a daily update to CJTFC.
1.B.2.J. South Korea: Full access, basing, and overflight rights. DoS does not anticipate any changes to this status.
1.B.2.K. Japan: Full access, basing, and overflight rights. DoS does not anticipate any changes to this status.

**1.C. Policy Goals.**

1.C.1. Protect the homeland.

1.C.2. Align US efforts with its network of allies and partners, acting with common purpose and in common cause toward deterrence and maintaining peace in the Indo-Pacific region.

1.C.3. Prevent any unilateral changes to the status quo in the Taiwan Strait and promote a peaceful resolution to cross-strait differences.

1.C.4. Ensure US and the free world nations retain access to the global commons.

**1.D. End State.** The US and its network of allies and partners restore peace and prosperity in the Indo-Pacific region, defend and uphold Taiwan's sovereignty, maintain international access to air and sea lines of communication in the Indo-Pacific region, secure the US homeland from kinetic and non-kinetic attack, and de-escalate the threat of nuclear weapons use.

**1.E. Operational Limitations.**

1.E.1. POTUS has authorized CJTF Agile Dragon to repel the PLA's invasion of mainland Taiwan through the use of lethal force, including kinetic and non-kinetic strikes on mainland China, as required.

1.E.2. Strikes on mainland China should not exceed the minimum required to achieve strategic objectives.

1.E.3. CJTF Agile Dragon will not employ first-use of nuclear weapons.

**1.F. Deterrent Options.** US forces will continue to deter escalation to nuclear weapons by maintaining continuous nuclear readiness.

**1.G. Enemy.**

1.G.1. **Force Composition.**

EXERCISE - OTS USE ONLY

1.G.1.A. See ANNEX B.

1.G.2. **Center of Gravity (COG) Analysis.**
1.G.2.A. Strategic COG
1.G.2.A.1. Chinese Communist Party (CCP) leadership.
1.G.2.A.2. Operational COG
1.G.2.A.3. PLA Fielded Forces.
1.G.2.A.3.A. Critical Capabilities. (1) Project combat power. (2) Deny access. (3) Control sea lines of communication and key island chains.
1.G.2.A.4. Information and Propaganda Infrastructure
1.G.2.A.4.A. Critical Capabilities. (1) Provide and protect space, intelligence, surveillance, and reconnaissance (ISR), and network communication architecture. (2) Conduct information operations, electronic warfare (EW), cyber operations, and psychological operations. (3) Maintain information superiority.

1.G.3. **Strategic Objectives.**
1.G.3.A. Ensure the survival and prosperity of the Chinese Communist Party (CCP).
1.G.3.B. Enhance national security.
1.G.3.C. Expand global influence.
1.G.3.D. Achieve the great rejuvenation of the Chinese nation, including reunification with Taiwan.

1.G.4. **Courses of Action.**

1.G.4.A. **Most Likely.**
1.G.4.A.1. Phase I: Shape. Complete.
1.G.4.A.2. Phase II: Isolate.
1.G.4.A.2.A. PLA establishes air and maritime superiority in the Taiwan Strait, East China Sea and South China Sea.
1.G.4.A.2.B. PLA forces seize Quemoy.
1.G.4.A.2.C. US and coalition command and control are degraded by cyber attacks.
1.G.4.A.3. Phase III: Dominate.
1.G.4.A.3.A. PLA forces conduct amphibious assault on Taiwan and establish a northern lodgment IVO Taoyuan and a southern lodgment IVO Tainan.
1.G.4.A.3.B. PLA forces seize the Penghu Islands.
1.G.4.A.3.C. PLA establishes air superiority over Taiwan.
1.G.4.A.4. Phase IV: Consolidate and Reorganize.
1.G.4.A.4.A. Taiwanese Armed Forces are destroyed.
1.G.4.A.4.B. Coalition Forces are destroyed or expelled from Taiwan.
1.G.4.A.4.C. Taiwanese government is removed.
1.G.4.A.4.D. PRC establishes civil control over Taiwan.

1.G.4.B. **Most Dangerous.**
1.G.4.B.1. Phase I: Shape. Complete.
1.G.4.B.2. Phase II: Isolate.
1.G.4.B.2.A. PLA establishes air and maritime superiority in the Taiwan Strait, East China Sea and South China Sea.

EXERCISE TS USE ONLY

1.G.4.B.2.B. PLA forces seize Quemoy.
1.G.4.B.2.C. US and coalition command and control are degraded by cyber attacks.
1.G.4.B.3. Phase III: Dominate.
1.G.4.B.3.A. PLA forces conduct amphibious assault on Taiwan and establish a northern lodgment IVO Taoyuan and a southern lodgment IVO Tainan.
1.G.4.B.4. PLARF launches precision strikes on US and coalition main operating bases and naval assets within the first and second island chain IOT degrade CJTF Agile Dragon's ability to quickly respond to the crisis.
1.G.4.B.4.A. PLA forces seize the Penghu Islands.
1.G.4.B.5. PLA forces will secure air and maritime superiority IVO Taiwan to prevent US forces from interfering with the invasion.
1.G.4.B.6. PLA seizes landing zones on the northern and eastern coastlines of Taiwan, preventing an amphibious landing of US forces on Taiwan.
1.G.4.B.7. Phase IV: Consolidate and Reorganize.
1.G.4.B.7.A. Taiwanese Armed Forces are destroyed.
1.G.4.B.7.B. Coalition Forces are destroyed or expelled from Taiwan.
1.G.4.B.7.C. Taiwanese government is removed.
1.G.4.B.7.D. PRC establishes civil control over Taiwan.

**1.H. Friendly.**

1.H.1. **Force Composition.**
1.H.1.A. See ANNEX A.

1.H.2. **Basing.**
1.H.2.A. Combined Joint Air Force forces will project power from main operating bases Yokota AB (15 AEW), Kadena AB (33 AEW), Andersen AFB (7 AEW), and JB Pearl Harbor-Hickam (22 AEW).
1.H.2.B. Combined Joint Force Space Component Commander will be in a supporting role to CFACC from the Combined Space Operations Center in Vandenberg Space Force Base, CA.
1.H.2.C. Contingency locations will be determined by expeditionary air wing (AEW) commanders with an emphasis on force survival and mission generation. See paragraph 1.B. for regional military-political assessment.

1.H.3. **COG Analysis.**
1.H.3.A. Strategic COG.
1.H.3.A.1. Commitment of allies and partners.
1.H.3.A.1.A. Critical Capabilities. (1) Combined forces combat power capabilities, basing access and overflight rights.
1.H.3.B. Operational COG.
1.H.3.B.1. CJTF Agile Dragon Fielded Forces.
1.H.3.B.1.A. Critical Capabilities. (1) Deny PLA access to Taiwan. (2) Maintain freedom of navigation within the global commons.

1.H.4. **Strategic Objectives.**
1.H.4.A. Protect the homeland.
1.H.4.B. Maintain a peaceful and stable Indo-Pacific region.

EXERCISE - OPS USE ONLY

1.H.5. Ensure US and the free world nations retain access to the global commons.

1.H.6. CDRUSPACOM is the supported commander.

**1.I. Joint Operating Area (JOA).**
1.I.1. The JOA is defined as the USPACOM AOR.

**1.J. Risk.**

1.J.1. **Risk to Force.**
1.J.1.A. Contingency locations in the Indo-Pacific region lack sufficient prepositioned supplies for sustained combat operations. Assessed Significant Risk.
1.J.1.B. Nuclear escalation. Assessed Moderate Risk.

1.J.2. **Risk to Mission.**
1.J.2.A. Main operating bases are within range of PRC ballistic missile attack. Ballistic missile attacks are capable of reducing airfield operating capabilities. Assessed High Risk.
1.J.2.B. Horizontal escalation beyond the JOA (i.e. Democratic People's Republic of Korea). Assessed Moderate Risk.
1.J.2.C. Nuclear escalation. Assessed Moderate Risk.
1.J.2.D. Loss of access to strategic maritime chokepoints. Assessed Moderate Risk.

1.J.3. **Acceptable Level of Risk (ALR).**
1.J.3.A. CAF. High.
1.J.3.B. MAF. High.
1.J.3.C. HVAA. Medium.
1.J.3.D. Spec Ops. High.

**2. MISSION.**

**2.A. Mission Statement**. CJTF Agile Dragon is directed to execute Operation PACIFIC SHIELD Phase 2.A and Phase 2.B. IOT neutralize PLA forces IVO Taiwan, defeat PRC attempts to deny access to the western Pacific global commons, and enable humanitarian assistance by government and non-governmental organizations IOT prevent the loss of Taiwan to the PRC, ensure the US and free world nations retain access to the global commons in the western Pacific, and mitigate a humanitarian crisis in Southeast Asia. CSpOC is directed to support Operation PACIFIC SHIELD to meet JFC intent and objectives. MEDCOM is directed to continue to support by establishing and running hospitals in the AOR to conduct triage, pick-up and track patient movement and recovery.

**3. EXECUTION**

**3.A. Commander's Intent.**

3.A.1. The purpose of Operation PACIFIC SHIELD Phase 2 is to preserve Taiwanese sovereignty, defeat the PRC's military aggression, and re-establish the status quo relations in the Taiwan Strait. CJTF Agile Dragon will defeat PRC attempts to deny access to the western Pacific

EXERCISE//CTS USE ONLY

global commons, defeat PLA forces IVO Taiwan, and enable humanitarian assistance in the Indo-Pacific region by government and non-governmental organizations.

3.A.2. CJTF Agile Dragon will continue an effective information operations (IO) campaign to garner the support of the international community, garner international condemnation of the PRC's aggression, demonstrate the coalition's strength in the JOA, and continue to increase the Taiwan military's capability and capacity to successfully defeat the PRC's invasion.

3.A.3. Neutralizing PLA forces IVO Taiwan will require Joint All-Domain Operations (JADO) to overcome the PLA's overmatch in several domains within the first island chain. Retaining access to the JOA's global commons necessitates control of key chokepoints in the South China Sea, East China Sea, and the Philippine Sea. Enabling humanitarian assistance operations in the JOA requires the prepositioning of supplies, movement of and coordination with DoS/NGOs, and secure locations.

3.A.4. CJTF Agile Dragon will continue proactive and reactive dispersal of forces to increase force survivability and complicate the enemy's targeting. AEW/CC's will establish adaptive cluster operations, using agile combat employment (ACE) concepts, to position CJTF Agile Dragon to survive and fight from positions of advantage. We must eliminate single points of failure in our power projection capabilities and fight from positions of advantage. Combined forces should minimize the time operating from each forward operating site IOT minimize the probability of being detected and successfully targeted by PLA forces. Damaged airfields should be repaired as quickly as possible.

3.A.5. The CJTF will provide force protection for US military installations within the USPACOM AOR and freedom of navigation in critical air and sea lines of communication in Southeast Asia.

3.A.6. This phase includes the decisive action of Operation PACIFIC SHIELD, with CJTF Agile Dragon securing Hualien sea port of debarkation (SPOD), seizing Keelung SPOD, and expelling PLA forces from Taiwan. The decisive action is a CFLCC amphibious landing to seize a foothold in Taiwan and clear PLA forces. The shaping actions of this phase include the CFACC/CFMCC conducting attack by fire on PRC-controlled islands in the South China Sea, PLA forces located on Penghu, mainland China IOT degrade its A2AD capabilities, and on amphibious landing zones on Taiwan. The supporting effort will consist of the CFMCC controlling maritime chokepoints and sea lines of communication in the JOA, Cyber and Space forces degrading enemy C6ISR while defending friendly C6ISR, ISR, transportation, and logistics.

**3.B. Military End State.** At the completion of Operation PACIFIC SHIELD Phase 2.A and Phase 2.B, the combined force will have neutralized PLA forces in the Taiwan Strait and South China Sea, upheld a free and open Indo-Pacific region by sustaining freedom of navigation in critical air and sea lines of communication, control critical APODs/SPODs in the JOA, neutralized PLA ground forces on Taiwan, and enabled humanitarian aid in the Indo-Pacific region to prevent an international humanitarian crisis.

**3.C. Objectives.**

EXERCISE//EXERCISE//EXERCISE
UNCLASSIFIED

3.C.1. **CJTF Agile Dragon.**
3.C.1.A. Restore and maintain an open, interconnected, prosperous, secure, and resilient Indo-Pacific region.
3.C.1.B. Defeat PLA forces IVO Taiwan's sovereign territory.
3.C.1.C. Prevent any unilateral changes to Taiwan Strait relations status quo.
3.C.1.D. Enable humanitarian assistance by government and non-governmental organizations.

3.C.2. **CFMCC**
3.C.2.A. Control sea and air lines of communication in the Central Pacific.
3.C.2.B. Control maritime chokepoints in Bay of Bengal, Strait of Malacca, South China Sea, East China Sea, and Philippine Sea.
3.C.2.C. Control Taiwan maritime approaches.
3.C.2.D. Conduct anti-submarine screen in East China Sea.
3.C.2.E. Degrade PLA A2AD capabilities IVO Taiwan.
3.C.2.F. Deny PLAAF operations IVO Taiwan.
3.C.2.G. Neutralize PLA forces in Spratley Islands.

3.C.3. **CFLCC**
3.C.3.A. Establish humanitarian operations supply depot.
3.C.3.B. Deny PLA ability to seize key terrain IVO Taiwan.
3.C.3.C. Destroy PLA forces on Taiwan.

3.C.4. **CFSOCC**
3.C.4.A. Conduct information operations campaign.

3.C.5. **CFACC**
3.C.5.A. Establish air superiority IVO Taiwan (HEX #405, 406, 505, 506, 605).
3.C.5.B. Support Combined Force Maritime Component Commander (CFMCC) operations to maintain a free and open Indo-Pacific region (HEX# 307, 308, 407, 506, 507, 605, 607, 708).
3.C.5.C. Ensure freedom of maneuver (FOM) through critical air lines of communication throughout Southeast Asia and central Pacific (HEX# 307, 407, 506, 507, 605).
3.C.5.D. Degrade PRC's anti-access/area denial (A2AD) capabilities ISO CJTF Agile Dragon operations (HEX# 106, 107, 206, 306, 405, 505, 506, 605).
3.C.5.E. Establish robust and resilient communications plan with HAF and AEW.
3.C.5.F. Support Combined Forces Land Component Commander (CFLCC) and CFMCC objectives IVO Taiwan (HEX# 307, 406, 506).
3.C.5.G. Deny PLAAF operations IVO Taiwan (HEX# 306, 307, 405, 406, 506).
3.C.5.H. Conduct ISR operations in western Pacific region (HEX# 308, 407, 507, 607, 708).

**3.C.6. CFSCC**
3.C.6.A. Support Combined Force Air Component Commander (CFACC) operations in the JOA. Specifically, CFSCC will support CFACC objectives to gain air superiority IVO Taiwan (HEX# 405, 406, 505, 506, 605).
3.C.6.B. Protect US main operating bases in the Indo-Pacific region. Specifically, prioritize the protection of US main operating bases in Japan, Korea, and the Philippines (HEX# 108, 207, 307, 308, 407, 506, 507, 605, 606, 607).

EXERCISE//EXERCISE//EXERCISE USE ONLY

3.C.6.C. Support degradation of PRC's A2AD capabilities ISO CJTF-Agile Dragon operations (HEX# 106, 107, 206, 306, 405, 505, 506, 605).
3.C.6.D. Support ISR operations in western Pacific region (HEX #308, 407, 508, 607, 708).
3.C.6.E. Establish robust and resilient communications plan with USPACOM, CJTF- Agile Dragon HQ, and AEW/CC.

3.C.7. **MEDCOM**
3.C.7.A. Establish four operational hospitals in the AOR.
3.C.7.B. Conduct aeromedical evacuation and lifesaving measures in support of the JFACC's mission in the Indo-Pacific AOR.
3.6.7.C. Transport and track causality movement from FOS to hospitals.
3.C.7.D. Conduct patient triage and patient care.

**3.D. Tasks.**

3.D.1. **Andersen AB, Guam.**
3.D.1.A. Continue proactive and reactive dispersal of combined forces IOT increase combined force survivability and complicate the enemy's targeting.
3.D.1.B. Build contingency location capacity to enable and sustain the launch and recovery of fighter aircraft ISO CFACC objectives.
3.D.1.C. Establish air superiority and provide fires ISO CFMCC and CFLCC objectives IVO Taiwan, Paracel Islands, and Spratley Islands (HEX# 405, 406, 505, 506, 605).
3.D.1.D. Degrade PRC's anti-access/area denial (A2AD) capabilities ISO CJTF Agile Dragon operations (HEX# 405, 505, 506, 605).

3.D.2. **Yokota AB, Japan.**
3.D.2.A. Continue proactive and reactive dispersal of combined forces IOT increase combined force survivability and complicate the enemy's targeting.
3.D.2.B. Build contingency location capacity to enable and sustain the launch and recovery of fighter aircraft ISO CFACC objectives.
3.D.2.C. Establish air superiority and provide fires ISO CFMCC and CFLCC objectives (HEX# 106, 107, 206, 306, 307).
3.D.2.D. Degrade PRC's anti-access/area denial (A2AD) capabilities ISO CJTF Agile Dragon operations (HEX# 106, 107, 206, 306, 307).

3.D.3. **Kadena AB, Japan.**
3.D.3.A. Continue proactive and reactive dispersal of combined forces IOT increase combined force survivability and complicate the enemy's targeting.
3.D.3.B. Build contingency location capacity to enable and sustain the launch and recovery of fighter aircraft ISO CFACC objectives.
3.D.3.C. Establish air superiority and provide fires ISO CFMCC objectives (HEX # 704, 804).
3.D.3.D. Establish air superiority IOT enable ISR operations in western Pacific region (HEX# 407, 507, 607).

3.D.4. **JB Pearl Harbor-Hickam, HI – OR – Osan AB**
3.D.4.A. Continue proactive and reactive dispersal of combined forces IOT increase combined

EXERCISE - OTS USE ONLY

force survivability and complicate the enemy's targeting.
3.D.4.B. Build contingency location capacity to enable and sustain the launch and recovery of fighter aircraft ISO CFACC objectives.
3.D.4.C. Establish air superiority and provide fires ISO CFMCC and CFLCC objectives IVO Taiwan, Paracel Islands, and Spratley Islands (HEX# 406, 505, 506).
3.D.4.D. Degrade PRC's anti-access/area denial (A2AD) capabilities ISO CJTF Agile Dragon operations (HEX# 306, 405, 406, 505, 506).

**3.E. Execution.**

3.E.1. **Phase 2.A.**

3.E.1.A. **Objectives – CJTF Agile Dragon.**
3.E.1.A.1. Neutralize PLA forces in the Spratley and Paracel Islands (HEX# 505, 506, 605).
3.E.1.A.2. Secure Hualien SPOD and seize Keelung SPOD (HEX# 406)
3.E.1.A.3. Degrade PLA A2AD capabilities IVO Taiwan (HEX# 306, 405, 406).
3.E.1.A.4. Control critical sea lines of communication in the central Pacific, maritime chokepoints in the JOA, and maritime approaches to Taiwan (HEX # 407, 507, 605, 704, 804).
3.E.1.A.5. Neutralize PLA lodgments on east coastline (HEX# 406).
3.E.1.A.6. Establish air and maritime superiority in East China Sea, South China Sea, and the Philippine Sea (HEX# 206, 307, 505, 506, 507, 605).
3.E.1.A.7. Establish air superiority over Taiwan (HEX# 406).

3.E.1.B. **Fires.** Attack by fire to:
3.E.1.B.1. Degrade A2AD capabilities in China.
3.E.1.B.2. Destroy Carrier Strike Group (CSG) in South China Sea and Surface Action Group (SAG) in East China Sea.
3.E.1.B.3. Neutralize airfields and surface-to-air missiles (SAM) IVO Spratley and Paracel Islands.
3.E.1.B.4. Destroy PLA forces on Penghu Island.
3.E.1.B.5. Interdict enemy fighter aircraft.

3.E.2. **Phase 2.B.**

3.E.2.A. **Objectives – CJTF Agile Dragon.**
3.E.2.A.1. Neutralize PLA force in the Spratley and Paracel Island (HEX# 505, 506, 605).
3.E.2.A.2. Control Hualien SPOD and Keelung SPOD. Establish seaport operations at Keelung SPOD and prepare to receive forces (HEX# 406).
3.E.2.A.3. Degrade PLA A2AD capabilities IVO Taiwan (HEX# 306, 405, 406).
3.E.2.A.4. Control critical sea lines of communication in the central Pacific, maritime chokepoints in the JOA, and maritime approaches to Taiwan (HEX # 407, 507, 605, 704, 804).
3.E.2.A.5. Neutralize PLA forces on Taiwan (HEX# 406).
3.E.2.A.6. Maintain air and maritime superiority in East China Sea, South China Sea, and the Philippine Sea (HEX# 206, 307, 505, 506, 507, 605).
3.E.2.A.7. Maintain air superiority over Taiwan (HEX# 406).

3.E.2.B. **Fires.** Attack by fire to:

EXERCISE ONLY OTS USE ONLY

3.E.2.B.1. Destroy CSG in South China Sea and SAG in East China Sea.
3.E.2.B.2. Destroy PLA forces on Taiwan east coastal lodgments.
3.E.2.B.3. Neutralize airfields and SAM IVO Spratley and Paracel Islands.
3.E.2.B.4. Degrade A2AD capabilities in China.

## 4. ADMINISTRATION AND LOGISTICS

**4.A. Concept of Sustainment.** Main Operating Bases will receive resupply via military sealift and airlift. AEW/CC will be responsible for coordinating, planning, and executing resupply of FOSs with allocated assets.

**4.B. Aircraft Allocation**

4.B.1. USTRANSCOM will determine aircraft apportionment of C-17, C-5, and C-130 to USPACOM at the beginning of each air tasking order (ATO) cycle.
4.B.1.A. USTRANSCOM will forecast aircraft apportionment for the next ATO cycle and is required to meet forecasted aircraft plus/minus three.

4.B.2. CJTF Agile Dragon CFACC will determine aircraft allocation to AEW IAW logistical requirements and CJTFC's priorities.

4.B.3. When able, USTRANSCOM will apportion C-5s dedicated to the execution of inter-theater strategic airlift IOT sustain combat power projection capabilities from MOBs in the JOA.

**4.C. Logistics**. AEW/CC will coordinate logistics requirements with CFACC. CFACC will allocate mobility airlift IAW MOB requirements and CJTFC's priorities.

4.C.1. Military sealift will provide limited logistical support for the sustainment of expendable commodities (i.e. fuel, food, water, and munitions) at MOBs within the JOA.

**4.D. Personnel**. When possible, AEW/CC should employ multi-capable airman (MCA) concepts to make the most efficient use of available manpower and reduce risk to force.

## 5. COMMAND AND CONTROL

**5.A. Supported & Supporting Relationships**. CDRUSPACOM is the supported commander for Operation PACIFIC SHIELD. Component and supporting commanders and directors of supporting DoD agencies will provide trained and equipped forces (as directed by SecDef), infrastructure, and force protection, as required, to support CJTFC's mission objectives.

5.A.1. Command Relationships (COMREL). See ANNEX J.

**5.B. CJTF Agile Dragon Tiered Command and Control Structure for Air Force forces.**

5.B.1. **Tier 1. Combined Joint Task Force Agile Dragon Air Operations Center (CAOC)**
5.B.1.A. Supporting Air Operations Centers (AOC)
5.B.1.A.1. USTRANSCOM AOC: Scott AFB, IL

EXERCISE - OTS USE ONLY

5.B.1.A.2. USPACOM AOC: JB Pearl-Harbor Hickam, HI.

5.B.2. **Tier 1. Combined Space Operations Center (CSpOC)**
5.B.2.A. Supporting Space Operations Center (CSpOC)
5.B.2.B. USPACOM CSpOC: Vandenberg Space Force Base, CA.

5.B.3. **Tier 2. Main Operating Base Expeditionary Wing Operations Center (WOC).**
5.B.3.A. WOC Gator: Kadena AB, Japan.
5.B.3.B. WOC Bulldog: Andersen AB, Guam.
5.B.3.C. WOC Volunteer: JB Pearl-Harbor Hickam, HI.
5.B.3.D. WOC Tiger: Yokota AB, Japan.

5.B.4. **Tier 1. Air Force Medical Command (MEDCOM)**
5.B.4.B. USPACOM MEDCOM: JB Pearl-Harbor Hickam, HI.

5.C.5. **Tier 3. Forward Operating Site Tactical Operations Center (TOC).**

**5.C. Component Commanders.**

5.C.1. **Combined Forces Air Component Commander (CFACC).**
5.C.1.A. CJTF Agile Dragon CFACC maintains tactical control (TACON) of fighter and mobility airlift assets assigned to or transiting USPACOM AOR through the CAOC. CFACC will allocate aircraft based on the needs of AEW/CCs and CJTFC objectives. USPACOM JFACC retains TACON of airborne C2, ISR, bombers, air refueling, and combat search and rescue (CSAR).
5.C.1.B. USTRANSCOM maintains operational control (OPCON) of mobility airlift assets (C-130, C-17, and C-5). Assets not previously assigned to USPACOM will not change operational control (CHOP) due to USTRANSCOM's enduring obligation to support global combatant commanders.

5.C.2. **Combined Forces Space Component Commander (CFSCC).**
5.C.2.A. CJTF Agile Dragon CFSCC maintains tactical control (TACON) of USSF satellites available for use by USSPACECOM in the USPACOM AOR through SpOC West at Vandenberg Space Force Base.

**5.D. Communication Plan.**

5.D.1. **HAF to HQ USPACOM/HQ CJTF Agile Dragon**
5.D.1.A. Primary: SATCOM broadband (secure)
5.D.1.B. Alternate: VHF-FM voice (secure)
5.D.1.C. Contingency: SATCOM voice (secure)
5.D.1.D. Emergency: HF voice

5.D.2. **CJTF Agile Dragon CAOC to WOC and MEDCOM**
5.D.2.A. Primary: Voice Comm (Non-Secure)
5.D.2.B. Alternate: CJTF Agile Dragon TEAMS Private Chat (Non-Secure)
5.D.2.C. Contingency: OPS Execution Spreadsheet

EXERCISE USE ONLY

5.D.2.D. Emergency: None

5.D.3. **CJTF Agile Dragon CAOC to CSpOC**
5.D.3.A. Primary: Voice Comm (Non-Secure)
5.D.3.B. Alternate: CJTF Agile Dragon TEAMS VTC (Non-Secure)
5.D.3.C. Contingency: CJTF Agile Dragon TEAMS Private Chat (Non-Secure)
5.D.3.D. Emergency: SATCOM Iridium

**5.E. C4I Disruption and Loss of Connectivity.**

5.E.1. Tactical Airmen and subordinate commanders must be prepared to operate under conditions where control has been decentralized and authorities delegated from the CJOC. Decentralized control will result in the following authorities being delegated to subordinate commanders: planning, directing, coordinating, and executing airlift and strike operations within the USPACOM AOR until communications are reestablished with higher node.
5.E.1.A. Any subordinate node (SN) that experiences C4I disruption and/or loss of connectivity will continue operations IAW this FRAGORD and CJTFC's intent.

5.E.2. The primary delegated command authority to the SN will be TACON.
5.E.2.A. If the Tier 1 node is isolated from SN, then Tier 2 nodes assume TACON over forces intra-base cluster mobility airlift and fires assets assigned to the base cluster. Tier 2 nodes will continue operations IAW the last received CFACC intent to achieve CJTFC's objectives.
5.E.2.B. Tier 2 nodes will not assume TACON over mobility assets executing inter-base cluster airlift operations. The Tier 2 node assumes TACON over fragged intra-theatre airlift operations only.
5.E.2.C. If the Tier 2 node is isolated from SN, then the Tier 3 nodes assume TACON over forces assigned to their node. Tier 3 nodes will direct mobility airlift assets to the nearest Tier 2 node for tasking.

**6. Additional Instructions.** Unauthorized compromise or distribution of this information can lead to removal from Officer Training School and UCMJ actions. AEW/CCs and JFACC will brief instructors NLT one hour after the initiation of planning on their plan for the first move.

EXERCISE - CTYSE ONLY

# ANNEX A

## TASK ORGANIZATION

**1. Units Assigned to USPACOM.**

**1.A. US ARMY**

1.A.1. **I Corps**
1.A.1.A. 7th Infantry Division
1.A.1.B. 25th Infantry Division
1.A.1.C. US Army Japan
1.A.1.D. 593rd Expeditionary Sustainment Command

1.A.2. **94th Army & Mission Defense Command**

1.A.3. **8th Theater Sustainment Command**
1.A.3.A. 8th Military Police Brigade
1.A.3.B. 130th Engineer Brigade

1.A.4. **311th Signal Command**

1.A.5. **500th Military Intelligence Brigade**

**1.B. US NAVY**

1.B.1. **US 3rd Fleet**
1.B.1.A. Carrier Strike Group One
1.B.1.B. Carrier Strike Group Three
1.B.1.C. Carrier Strike Group Nine
1.B.1.D. Carrier Strike Group Eleven
1.B.1.E. Carrier Strike Group Fifteen
1.B.1.F. Expeditionary Strike Group Three
1.B.1.G. Naval Surface Group Mid-Pacific
1.B.1.H. Littoral Combat Ship Squadron One
1.B.1.I. Helicopter Maritime Strike Wing
1.B.1.J. Mine Countermeasures Group Three
1.B.1.K. Explosive Ordnance Disposal Group One
1.B.1.L. Coastal Riverine Group One
1.B.1.M. Navy Air & Missile Defense Command
1.B.1.N. Naval Mine & Anti-Submarine Warfare Command
1.B.1.O. Submarine & Theater Anti-Submarine Warfare Force Third Fleet

1.B.2. **US 7th Fleet**
1.B.2.A. Task Force 70
1.B.2.A.1. Surface Combatant Force
1.B.2.A.2. Carrier Strike Group Five

EXERCISE - OTS USE ONLY

1.B.2.B. Task Force 71
1.B.2.B.1. Naval Special Warfare
1.B.2.C. Task Force 72
1.B.2.C.1. Patrol & Reconnaissance Force
1.B.2.D. Task Force 73
1.B.2.D.1. Logistics Group Western Pacific
1.B.2.E. Task Force 74
1.B.2.E.1. Fleet Submarine Force
1.B.2.F. Task Force 75
1.B.2.G. Task Force 76
1.B.2.G.1. Amphibious Assault Task Force

# OPERATION PACIFIC SHIELD: Phase 2.A. – Seize Foothold and Clear

**Narrative: This phase includes the decisive action of this operation, with CJTF Agile Dragon securing Hualien SPOD, seizing Keelung SPOD, & expelling PLA forces from Taiwan. The decisive action is a JFLCC amphibious landing to seize a foothold in Taiwan & clear PLA forces. The shaping actions of this phase include: the CFACC/CFMCC conducting attack by fire on PRC-controlled islands in the SCS, PLA forces located on Penghu, mainland China to degrade its A2/AD capabilities, and on amphibious LZs on Taiwan. The CFMCC controls maritime chokepoints & SLOCs throughout the JOA; and Cyber and Space forces will degrade enemy C6ISR offensive cyberspace operations while guarding the coalition's C6ISR with defensive cyberspace operations.**

## Joint Function

**Information**
- Themes: Synergy, Unity of Effort
- EW: EA (Radar jamming), EP, ES
- Cyber: OCO to degrade PLA C2 capes
- Space: Offensive space to degrade PLA C2 capes
- MILDEC: Convince PLA Coalition forces are larger than they are
- MISO: Conduct IO to diminish PLA's will to fight

**Intelligence**
- NAIs: Taiwan Strait, Strait of Malacca, Luzon Strait, South China Sea, Yellow Sea.
- Assets: EP-3s, MQ-4Cs, E-3s, RC-135s, RQ-9s, JSTARS, & Satellites

**Command and Control**
- Locations: INDOPACOM HQ, CJTF C2 node (Hawaii)
- PACE: SATCOM broadband secure (P), VHF-FM voice secure (A), SATCOM voice secure (C), HF voice (E)

**Movement and Maneuver**

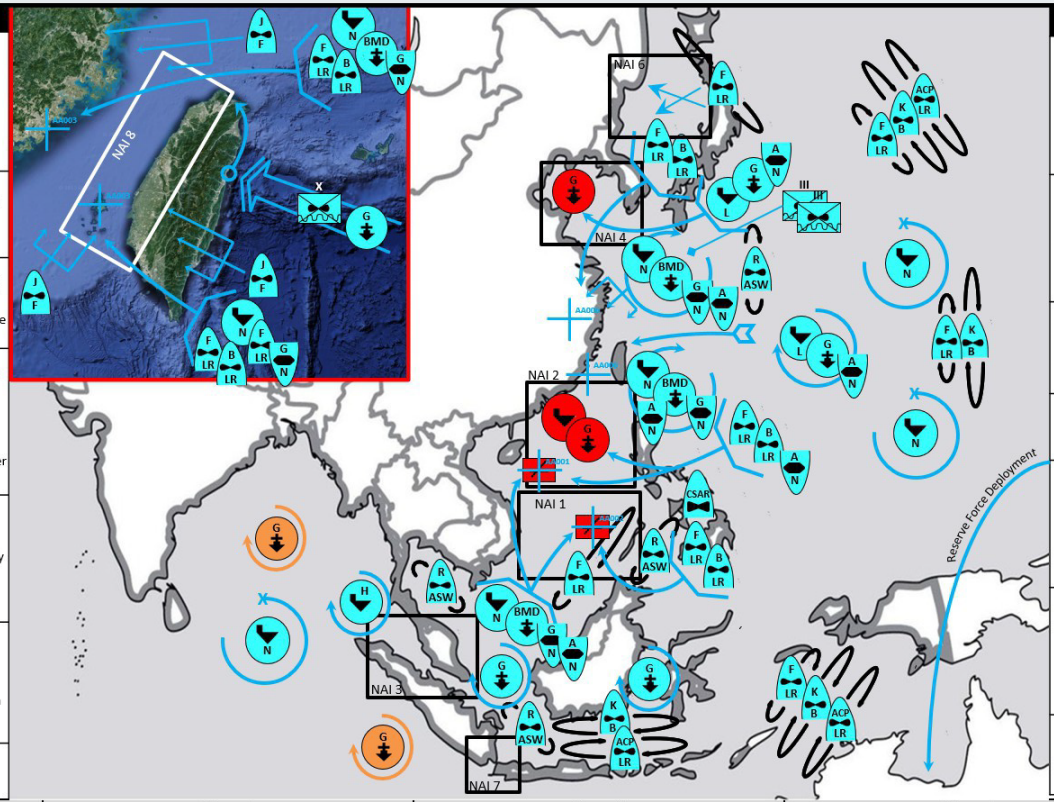

Continue proactive and reactive dispersal operations, IAW threat timelines.
CSG will maneuver to secure Luzon Strait, East China Sea, & southern portion of South China Sea.
SAG will move to secure maritime chokepoints.
MEB will move to secure Hualien SPOD, and maneuver to seize Keelung SPOD. CAG will follow & support.

**Fires**

Attack by fire to degrade A2AD capabilities on China.
Attack by fire to destroy CSG in SCS and SAG in ECS.
Attack by fire to neutralize airfields & SAM IVO Spratly & Paracel Islands.
Attack by fire PLA forces on Penghu Island.
Interdict ENY fighter aircraft.

**Sustainment**
- Supply Priority:
  - -CSG and SSN in Luzon strait, ECS and SCS
  - -Fighter operations from CLs
- Transportation: MSC force movement into Taiwan
- Locations: MOB/CL
- Activities: Bulk class V, III, IV, VIII

**Protection**
- CAL: APODs/SPODs, HQs, aircraft carriers
- Units: Rescue Squadrons, MEUs

## Tasks by Component

**CFMCC**
- Control SLOCs/ALOCs in Central Pacific
- Control maritime chokepoints
- Control Taiwan maritime approaches
- Screen in ECS
- Degrade PLA A2AD capabilities
- Deny PLAAF operations IVO Taiwan
- Neutralize PLA forces in Spratly Islands

**CFACC**
- Control ALOCs in Central Pacific
- Deny PLAAF operations IVO Taiwan
- Control Taiwan maritime approaches
- Degrade PLA A2AD capabilities

**CFLCC**
- Establish HA supply depots
- Deny PLA ability to seize terrain
- Destroy PLA forces in Taiwan

**CSOTF**
- Conduct IO campaign

**SPACECOM (Direct Support)**
- Conduct offensive space operations
- Conduct defensive space operations

**CYBERCOM (Direct Support)**
- Conduct offensive cyber operations
- Conduct defensive cyber operations
- Degrade PLA A2AD capabilities

**TRANSCOM**
- Enable sustainment of MOB/CL in Indo-Pacific region.
